4th Rainy River Christmas Bird Count

Saturday, December 15, 2018

You do not need to put your name or any contact information on this form.

Where did you make your observations?
(e.g. "Walking Around Rainy River," "My Backyard in Gameland," "Blue Road 3")

About what time did you start counting? _____
How long did you count for? _____
How many people counted? _____
(if you are birding with a group of people, have only one person keep track)

How to Count the Birds

On the chart below, please write your best estimate of the number of birds of each species you saw. It's helpful if you can use the official species name (for example, "Sharp-tailed Grouse" instead of "Partridge.") We have lots of field guides at the Library if you need help with identification. If you still cannot be sure about a species, do not report it. When counting each species, report the largest number of birds you see at any one time. For example: if you see four Blue Jays together at 10 o'clock, six Blue Jays together at noon, and three Blue Jays together at 3 o'clock, you would count six Blue Jays for the day.

Your Checklist
